ABSTRACT

BUSINESS CASE

At Moondime Token we intend to construct a community driven ecosystem with direct income to content makers and a local area that will boost the two makers and ordinary clients.

We plan to be a local area center where individuals can discover other fascinating networks and tasks to take part in.

PROBLEM STATEMENT

have discovered that despite the fact that there are numerous image networks out there, none are right now working in a decentralized route on the blockchain. Current networks essentially adapt makers work essentially through advertisements, and little to none of this pay gets gone to the maker.

PROPOSED SOLUTION

By utilizing the decentralized nature of the blockchain environment, we desire to build up a stage that will be progressive for content makers what's more, clients the same. By working in a decentralized climate and permitting makers and clients to connect straightforwardly, Images Token will give direct remuneration to makers and an advertisement free environment for clients. Makers will have a more prominent motivation to create substance, and clients will have a more noteworthy impetus to utilize our foundation.

LONG-TERM FOCUS

Despite the fact that the stage dispatched on Binance Smart Chain we plan to research different stages to limit exchange charges and boost speed and solidness. Potential arrangements include: Polkadot also, Ethereum 2.0. We will be looking at potential alternatives to figure out what might be the most gainful to clients.

DECENTRALIZED

SECURITY

PRESALE LIQUIDITY LOCKED

30% for 12 months

AUTOMATIC LIQUIDITY

Automatic tax on each swap:
6% added to liquidity
4% returned to holders

LOCKED RESERVES

150 trillion tokens locked and will
be returned in 10 instalments

TOKENOMICS

To guarantee the practicality of the undertaking long haul a little part of each exchange goes into the life span and soundness of the venture:

-6% will automatically go into the locked liquidity pool, as
MOONDIME/BNB pair to ensure stable pricing

-4% will be automatically redistributed

We discovered these rates to strike a strong harmony between profiting holders and permitting simplicity of exchanging without high charges. In opposition to different tokens, there is no consume in light of the fact that we're constructing a long-term environment and we need to keep away from decrease in liquidity and counterfeit increment of the worth

LIQUIDITY AND SECURITY

To guarantee liquidity and security to the local area the liquidity has been locked with pancakeswap and 30% of token supply is locked too until January with 10 deliveries en route. Upon each arrival of the locked tokens, there will be a local area vote to choose how the tokens will be disseminated for example improvement and showcasing spending plan, local area advancements, going into the liquidity pool or returning it to the locked pool for some time in the future.

BREAKDOWN

■ Marketing 5%

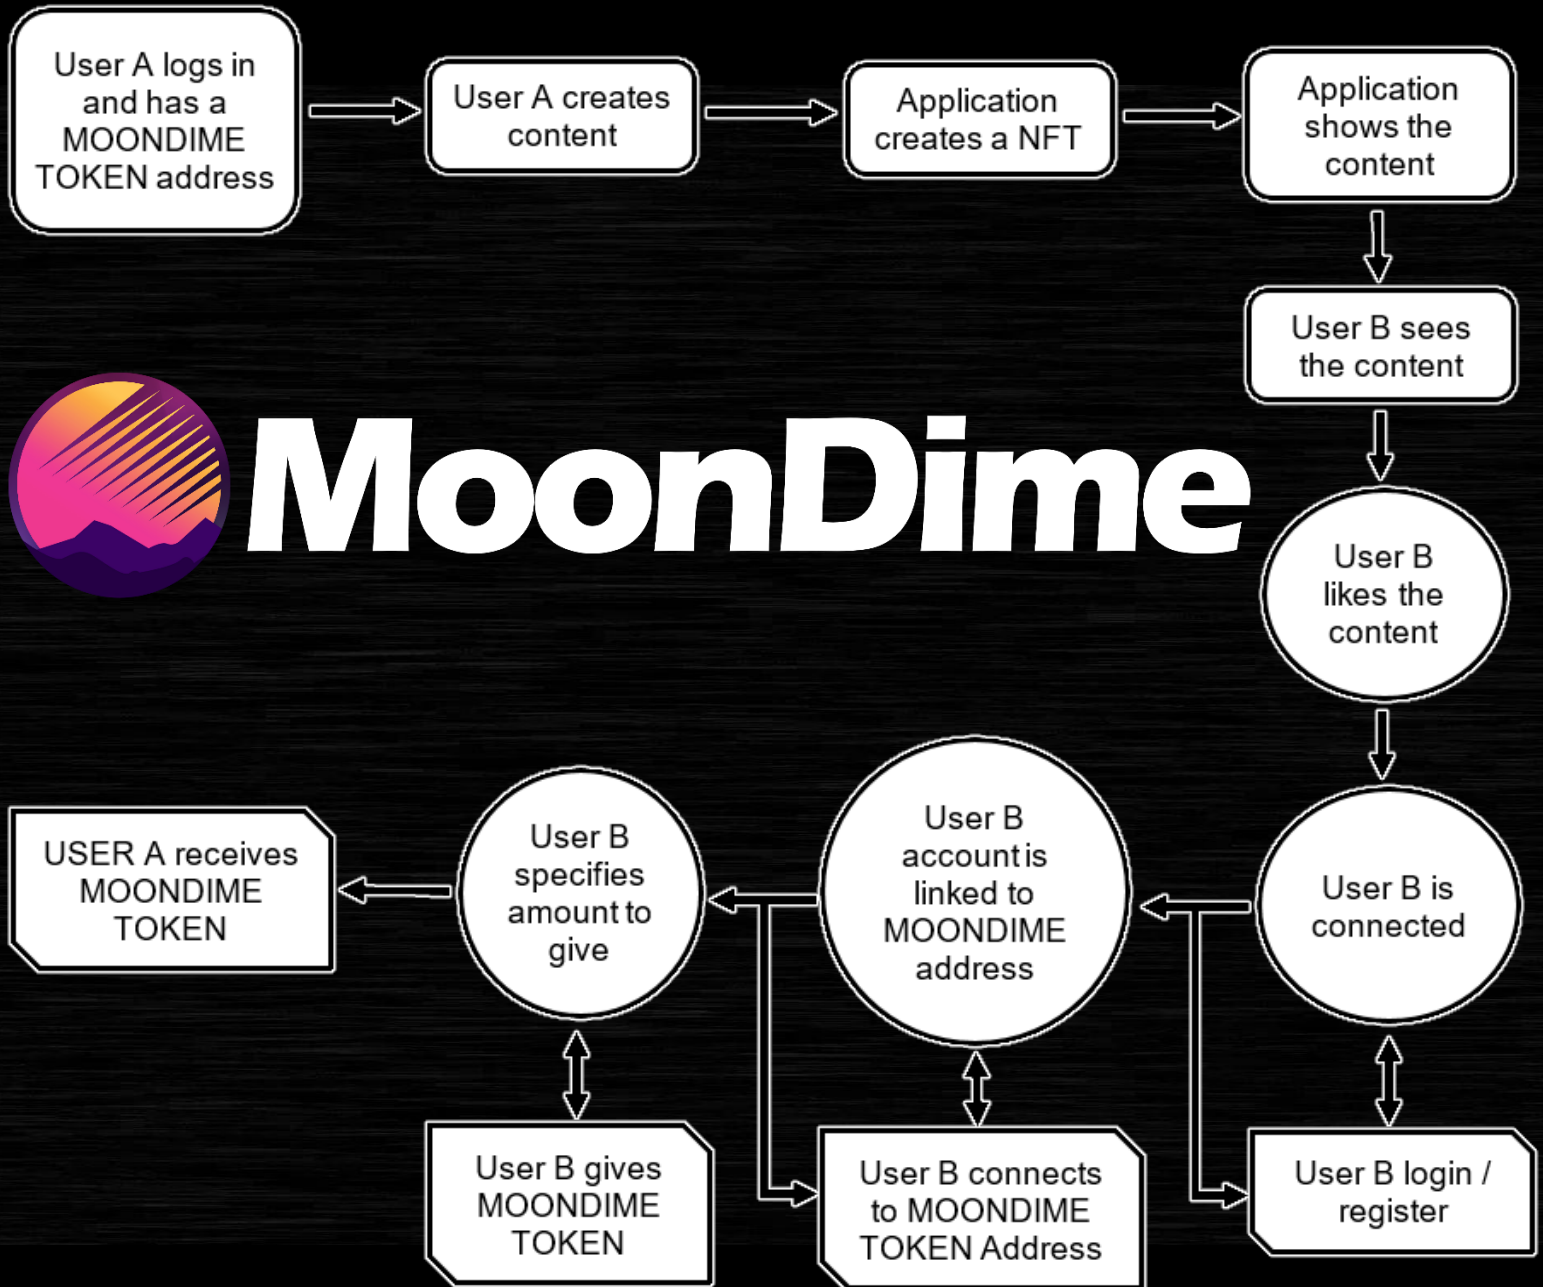

■ Initial Burning 50%

■ Locked Reserve Fund 15%

■ Locked Liquidity 30%
